Amazon Kendra ▾

[Overview](#)[Features](#)[Connectors](#)[Pricing ▾](#)[Resources](#)[FAQs](#)[Customers](#)[Products](#) / [Machine Learning](#) / [Amazon Kendra](#)

Connectors

Using connectors makes it easy to synchronize data from multiple content repositories with your Amazon Kendra index. Connectors can be scheduled to automatically sync your index with your data source, so you're always securely searching through the most up to date content.

Amazon Kendra native connectors

[Get Started for Free](#)[Contact Us](#)

Alfresco On-Prem Connector

Alfresco connector for indexing and searching documents in Alfresco On-Prem Repository.

[Learn More »](#)

Amazon Relational Database (RDS)

Amazon Kendra's connector for Amazon Relational Database (RDS) can be used to add documents and data that are stored in an Amazon RDS location to your Amazon Kendra index.

[Learn More »](#)

Amazon Simple Storage Service (S3)

Amazon Kendra's connector for Amazon Simple Storage Service (S3) can be used to add documents and metadata stored in an S3 bucket to your Amazon Kendra index. Use the Kendra S3 Connector to also crawl Amazon S3 buckets in a secure environment like a VPC.

[Learn More »](#)

Amazon FSx

Amazon Kendra FSx Connector indexes documents from FSx for Windows File Server file systems. Amazon FSx for Windows File Server provides fully managed shared storage built on Windows Server, and delivers a wide range of data access, data management, and administrative capabilities.

[Learn More »](#)

[Get Started for Free](#)[Contact Us](#)

spaces, profiles and hub sites for tags from on-premise server instances. The connector supports Confluence's document access attributes.

[Learn More »](#)

Atlassian Confluence Cloud

Amazon Kendra's connector for Confluence Cloud indexes pages, blog posts, attachments, comments, spaces, profiles, and hub sites for tags in cloud-based Confluence sources. The connector supports Confluence's document access attributes.

[Learn More »](#)

Box Connector

Box connector for indexing and searching documents in a Box Enterprise repository.

[Learn More »](#)

Dropbox Connector

Dropbox connector for indexing and searching documents in Dropbox Repository.

[Learn More »](#)

[Get Started for Free](#)[Contact Us](#)[Learn More »](#)

Jira Connector

Jira connector for indexing and searching documents in Jira Cloud.

[Learn More »](#)

Microsoft OneDrive

Amazon Kendra's connector for Microsoft OneDrive indexes folders, documents, and fully supports OneDrive's document access attributes, as well as Azure Active Directory. It also supports federated authentication and Office365 tenants.

[Learn More »](#)

[Get Started for Free](#)[Contact Us](#)

repositories with support for document access attributes.

[Learn More »](#)

Quip Connector

Quip connector for indexing and searching documents in a Quip Enterprise repository.

[Learn More »](#)

GitHub On-Prem Connector

GitHub connector for indexing and searching documents in GitHub Enterprise Server data source.

[Learn More »](#)

GitHub SaaS Connector

GitHub connector for indexing and searching documents in GitHub Enterprise Cloud data source repository.

[Learn More »](#)

[Get Started for Free](#)[Contact Us](#)

Catalog, as well as knowledge articles and attachments from ServiceNow public knowledge bases.

[Learn More »](#)

ServiceNow Connector V2.0

Use the Kendra ServiceNow Connector to index Knowledge Articles, Service Catalog documents, and Incidents, along with their attachments from ServiceNow, and search for information across this content using Kendra Intelligent Search.

[Learn More »](#)

Microsoft Teams Connector

Use the Kendra MS Teams Connector to index and search messages and other entities from Microsoft Teams.

[Learn More »](#)

Microsoft Exchange Connector

Use the Kendra MS Exchange Connector to index e-mail messages, attachments, OneNote documents, contacts, and calendar events in mailboxes and public folders from MS Exchange, and search for information across content using Kendra Intelligent Search.

[Learn more »](#)

[Get Started for Free](#)[Contact Us](#)

Amazon Kendra customers can now use the Kendra MS Yammer Connector to index messages and search for information across this content using Kendra Intelligent Search.

[Learn more »](#)

Salesforce Connector V1.0

Amazon Kendra's connector for Salesforce indexes accounts, profiles, leads, cases and many other common objects stored in Salesforce. The connector fully supports Salesforce's document attributes.

[Learn More »](#)

Salesforce Connector V2.0

Use the Kendra Salesforce Connector to index documents and search for information across their Salesforce content using Kendra Intelligent Search. Salesforce contains a number of entities such as Accounts, Campaigns, Cases, Opportunities, Leads, Knowledge Articles and more. The Amazon Kendra Salesforce connector helps to index all these entities and their attachments where applicable.

[Learn More »](#)

Slack Connector

Kendra Slack Connector to index messages and search for information across this content using Kendra Intelligent Search.

[Get Started for Free](#)[Contact Us](#)

Google Drive Connector V1.0

Amazon Kendra's connector for Google Drive indexes content from personal drives, team drives, and can be used with Google Docs and Google Slides. The connector supports Google Drive's built-in permission model with support for document access attributes.

[Learn More »](#)

Custom Data Source Connector

Amazon Kendra's connector for custom data sources allows users to leverage the Kendra API to create their own custom connectors and push content directly into Amazon Kendra from any content repository.

[Learn More »](#)

Web Crawler

Amazon Kendra's Web Crawler for indexing and searching webpages and other documents made available on websites. The web crawler honors access rules in robots.txt. Users need to ensure they are authorized to index websites in order to return search results for their end users.

[Learn More »](#)

[Get Started for Free](#)[Contact Us](#)

Server.

[Learn More »](#)

Sharepoint 2016 Connector

SharePoint connector for indexing and searching documents from a Microsoft SharePoint 2016 Server.

[Learn More »](#)

WorkDocs Connector

Amazon Kendra's WorkDocs connector for indexing and searching documents from Amazon WorkDocs. You can index HTML, PDF, MS Word, MS PowerPoint, and plain text documents to search for information across this content using Amazon Kendra's intelligent search.

[Learn More »](#)

Zendesk Connector

Zendesk connector for indexing and searching documents in Zendesk Repository.

[Learn More »](#)

[Get Started for Free](#)[Contact Us](#)

Partner developed connectors

The connectors below have been developed by AWS Partners. You can contact the partner directly to learn more about using these connectors with your Amazon Kendra index.

Aderant Connector

By [BA Insight](#)

Integrating Aderant with an organization's search engine makes it easier for lawyers and other firm employees throughout the organization to find important information stored in Aderant without the need to directly log in and perform a separate search.

[Contact Partner »](#)

Adobe AEM Connector

By [Raytion](#)

Secure enterprise search connector for reliably indexing content from the Adobe Active Experience Manager (AEM). It robustly indexes pages, attachments and other generated document types from Adobe AEM in near real time. The connector fully supports Adobe AEM's permission model, its built-in user and group management, as well as AEM installations based on Active Directory or other directory services.

[Contact Partner »](#)

Adobe Experience Manager Connector

By [BA Insight](#)

[Get Started for Free](#)[Contact Us](#)

Adobe Experience Manager Connector

By **Perficient**

The Handshake Adobe Experience Manager (AEM) Connector synchronizes AEM pages, components, metadata, and permissions to Amazon Kendra. A Handshake component is installed locally to AEM to automatically construct and synchronize searchable content at publishing time. Administration defines content path eligibility, document conversion, and metadata inclusion and exclusion filters for go forward and back synchronization. Perficient connectors are built on a dynamic framework, boasting configurable preprocessing and transformation pipelines, scalability, and secure deployment and management of your content.

[Contact Partner »](#)

Alfresco Connector

By **Raytion**

Secure enterprise search connector for reliably indexing content from Alfresco One. It robustly indexes files, folders and user profiles from Alfresco One in near real time. The connector fully supports Alfresco One's permission model, its built-in user and group management, as well as Alfresco One installations based on Active Directory and other directory services.

[Contact Partner »](#)

Alfresco Connector

By **BA Insight**

The Alfresco Connector supports both full and incremental crawls. Incremental crawls extract only content that has changed since the last crawl.

[Contact Partner »](#)

[Get Started for Free](#)[Contact Us](#)

Our Amazon Aurora Connector honors the security of source databases and provides both full and incremental crawls so that users have the latest information available to them at all times.

[Contact Partner »](#)

Amazon RDS

By BA Insight

BA Insight's Amazon RDS Connector indexes content from multiple search engines, surfacing it through BA Insight's SmartHub to provide users with integrated search results.

[Contact Partner »](#)

Amazon S3

By BA Insight

The BAI Amazon S3 connector makes it possible to surface content from S3 using the preferred search engine, enabling users to get integrated search results that include files stored in S3.

[Contact Partner »](#)

Atlassian Confluence Connector

By Perficient

The Handshake connector for Atlassian Confluence is compatible with both Confluence On-premise and Confluence Cloud. Content can be filtered by dates, space, comments, and security exclusions to control indexing and result permissions. Perficient connectors are built on a dynamic framework, boasting configurable preprocessing and transformation pipelines, scalability, and secure deployment and management of your content.

[Get Started for Free](#)[Contact Us](#)

Atlassian Confluence Connector

By Raytion

Secure enterprise search connector for reliably indexing content from Atlassian Confluence Server. It robustly indexes pages, blog posts, attachments, comments, spaces, profiles, and hub sites for tags from on-premise Confluence instances in near real time. The connector fully supports Atlassian Confluence's built-in user and group management, as well as Confluence installations based on Active Directory and other directory services.

[Contact Partner »](#)

Atlassian Confluence Cloud Connector

By Raytion

Secure enterprise search connector for reliably indexing content from Atlassian Confluence Cloud. It robustly indexes pages, blog posts, attachments, comments, spaces, profiles, and hub sites for tags from Confluence Cloud instances in near real time. The connector fully supports Atlassian Confluence Cloud's built-in user and group management.

[Contact Partner »](#)

[Get Started for Free](#)[Contact Us](#)

The Handshake connector for Atlassian JIRA is compatible with JIRA Server and JIRA Cloud. Connections are defined by JIRA Query Language filters for fine tuned control over fields, projects, and translation to search. The connector maintains and populates JIRA permissions to Kendra. Perficient connectors are built on a dynamic framework, boasting configurable preprocessing and transformation pipelines, scalability, and secure deployment and management of your content.

[Contact Partner »](#)

Atlassian Jira Connector

By Raytion

Secure enterprise search connector for reliably indexing content from Atlassian Jira. It robustly indexes projects, issues, attachments, comments, work logs, issue histories, links, and profiles from on-premise Jira instances in near real time. The connector fully supports Atlassian Jira's built-in user and group management, as well as Jira installations based on Active Directory and other directory services.

[Contact Partner »](#)

Atlassian Jira Cloud Connector

By Raytion

Secure enterprise search connector for reliably indexing content from Atlassian Jira Cloud. It robustly indexes projects, issues, attachments, comments, work logs, issue histories, links and profiles from Jira Cloud in near real time. The connector fully supports Atlassian Jira Cloud's built-in user and group management.

[Contact Partner »](#)

Azure Active Directory Connector

By BA Insight

[Get Started for Free](#)[Contact Us](#)

Azure SQL Database Connector

By **BA Insight**

BA Insight's Azure SQL Database Connector honors the security of the source database and provides both full and incremental crawls so that users have the latest information available to them all of the time.

[Contact Partner »](#)

Bentley Connector

By **BA Insight**

The BAI Bentley AssetWise Connector makes it possible to surface content from AssetWise into a single consolidated search index, along with content from other repositories.

[Contact Partner »](#)

Bing News Connector

By **BA Insight**

BA Insight's SmartHub and our Bing News Federated Connector bring together organizational content and up to date news from global online news sites.

[Contact Partner »](#)

Bing Web Search Connector

[Get Started for Free](#)[Contact Us](#)[Contact Partner »](#)

Box Connector

By **BA Insight**

The BA Insight Box connector makes it possible to surface content from Box in SharePoint and other portals, enabling users to get integrated search results from the preferred search engine and Box.

[Contact Partner »](#)

Box Connector

By **Raytion**

Secure enterprise search connector for reliably indexing content from Box. It robustly indexes files, folders, comments, users, groups, and tasks from Box in near real time. The connector fully supports Box' built-in user and group management.

[Contact Partner »](#)

Confluence Connector

By **BA Insight**

Our Confluence Connector is an enterprise grade indexing connector that enables content stored in Confluence to be crawled and indexed.

[Contact Partner »](#)

Confluence (Cloud) Connector

[Get Started for Free](#)[Contact Us](#)[Contact Partner »](#)

CuadraSTAR Connector

By BA Insight

The BA Insight CuadraSTAR Connector crawls content in CuadraSTAR and creates a single index that makes it possible to use your preferred search engine to find relevant information within CuadraSTAR, as well as over 80 other supported repositories, eliminating the need to perform separate searches.

[Contact Partner »](#)

Deltek Connector

By BA Insight

The Deltek Vision Connector honors the security of the source system and provides both full and incremental crawls so that users have the latest information available to them all the time.

[Contact Partner »](#)

Disqover Connector

By BA Insight

Combining information from DISQOVER and internal search applications provides your teams access to all connected information in a single search interface, allowing them to master the flood of information in healthcare and life sciences, speed up the research and go-to-market of new treatments and products, and reveal hidden correlations.

[Contact Partner »](#)

[Get Started for Free](#)[Contact Us](#)

Secure enterprise search connector for reliably indexing content from OpenText Documentum. It robustly indexes repositories, folders and files together with their meta data and properties from Documentum in near real time. The connector fully supports OpenText Documentum's built-in user and group management.

[Contact Partner »](#)

Documentum eRoom Connector

By Raytion

Secure enterprise search connector for reliably indexing content from OpenText Documentum eRoom. It robustly indexes repositories, folders and files together with their meta data and properties from Documentum eRoom in near real time. The connector fully supports OpenText Documentum eRoom's built-in user and group management.

[Contact Partner »](#)

Egnyte Connector

By BA Insight

The Egnyte Connector supports both full and incremental crawls and indexes with very high throughput.

[Contact Partner »](#)

Egnyte (Federated) Connector

By BA Insight

Our Egnyte Federated Connector enables content stored in Egnyte to be included in enterprise search without the need to re-index content. At query time, search results from Egnyte are merged

[Get Started for Free](#)[Contact Us](#)

Elastic Path Connector

By **Perficient**

The Handshake Elastic Path Connector brings the power of headless commerce to search. The connector assembles searchable objects from collection endpoints and surfaces rich data as fields, reducing the complexity of building searchable catalogs and leveraging the power of Elastic Path's headless commerce platform. It currently supports EP's Catalog APIs and crawls on a schedule. Perficient connectors are built on a dynamic framework, boasting configurable preprocessing and transformation pipelines, scalability, and secure deployment and management of your content.

[Contact Partner »](#)

Elasticsearch Connector

By **Perficient**

Elasticsearch is a commonly used search engine, but its powerful aggregation and flexible deployment options lead it to be used as a data storage and retrieval engine as often as a typical search engine. With the Handshake Elasticsearch Connector, you can stream Elastic analytics and process data managed in Amazon Kendra or migrate data between search engines. The connector provides control over field inclusion and exclusion and attachment support. Perficient connectors are built on a dynamic framework, boasting configurable preprocessing and transformation pipelines, scalability, and secure deployment and management of your content.

[Contact Partner »](#)

Elite Connector

By **BA Insight**

BA Insight's Elite Connector provides a single point of access for lawyers to access firm content and knowledge in line with Elite content using various search engines.

[Get Started for Free](#)[Contact Us](#)

By BA Insight

Our eRoom Connector establishes a secure connection to the eRoom application and maps the content, including metadata and attachments, from the eRoom schema to the search engine schema.

[Contact Partner »](#)

Facebook Workplace Connector

By Raytion

Secure enterprise search connector for reliably indexing content from Facebook Workplace. It robustly indexes project groups, conversations and shared documents from Facebook Workplace in near real time. The connector fully supports Facebook Workplace's built-in user and group management.

[Contact Partner »](#)

File Share Connector

By BA Insight

The BA Insight File Share Connector makes it possible to surface content from File Shares (Windows, SMB/CIFS) in a single consolidated search index, along with content from other repositories.

[Contact Partner »](#)

File System Connector

By Raytion

[Get Started for Free](#)[Contact Us](#)

FirstSpirit Connector

By Raytion

The connector for Atlassian Confluence Cloud fully supports its security model. It robustly indexes pages, blog posts, attachments and more from Confluence Cloud instances. All in near real time. Likewise, it entirely fosters the built-in user and group management by Confluence Cloud.

[Contact Partner »](#)

Generic PUSH Listener Connector

By Perficient

PUSH pipelines can be configured to always listen for content from external REST APIs and event-based triggers built within source systems. The model is very flexible. Objects are sent matching the Handshake format and can be treated to the same transformations and batched indexing to search targets as any other source. This approach requires no scheduling and synchronizes the external source application to search target in near real time. Perficient connectors are built on a dynamic framework, boasting configurable preprocessing and transformation pipelines, scalability, and secure deployment and management of your content.

[Contact Partner »](#)

Generic SQL Database Connector

By Perficient

JDBC drivers for many of the most popular SQL DB protocols are included in Handshake by default, but others can be added. Database connectors can be used as standalone solutions, or as transformations in other Handshake pipelines to enrich content before reaching a search index. It allows greater control over the returned data and optional construction of an HTML representation of SQL data. Compatible with local and remote databases. Perficient connectors are built on a

[Get Started for Free](#)[Contact Us](#)

GitLab Connector

By Raytion

Secure enterprise search connector for reliably indexing content from GitLab. It robustly indexes projects, files, folders, commit messages, issues, and wiki pages from GitLab in near real time. The connector fully supports GitLab's built-in user and group management.

[Contact Partner »](#)

Google Cloud Connector

By BA Insight

The Google Cloud SQL Connector indexes content from Google Cloud SQL into various search engines, surfacing it through BA Insight's SmartHub to provide users with integrated search results.

[Contact Partner »](#)

Google Drive Connector

By BA Insight

The BAI Google Drive connector makes it possible to surface content from Google Drive in a single consolidated search index referencing Google Drive content, along with content from other repositories.

[Contact Partner »](#)

Google Drive Connector

By Raytion

[Get Started for Free](#)[Contact Us](#)[Contact Partner »](#)

HP Consolidated Archive Connector

By **BA Insight**

BA Insight's HP Consolidated Archive Connector securely indexes both the full text and metadata of documents in archives into various search engines. This enables a single searchable result set across content from multiple repositories.

[Contact Partner »](#)

HPE Records Manager Connector

By **BA Insight**

Our HP TRIM Connector was specifically developed for HP Records Manager, establishing a secure connection to the TRIM application and mapping the content including metadata and attachments from the TRIM schema to the search engine schema.

[Contact Partner »](#)

IBM Connections Cloud Connector

By **Raytion**

Secure enterprise search connector for reliably indexing content from IBM Connections Cloud. It robustly indexes public and personal files, blogs, wikis, forums, communities, profiles, and status updates from Connections Cloud in near real time. The connector fully supports IBM Connections Cloud's built-in user and group management.

[Contact Partner »](#)

[Get Started for Free](#)[Contact Us](#)

Our IBM Connections Connector was specifically developed for IBM Connections, establishing a secure connection to the Connections application and mapping the content including metadata and attachments from the Connections schema to the search engine schema.

[Contact Partner »](#)

IBM Connections Connector

By Raytion

Secure enterprise search connector for reliably indexing content from IBM Connections. It robustly indexes public and personal files, blogs, wikis, forums, communities, bookmarks, profiles, and status updates from on-premises Connections instances in near real time. The connector fully supports IBM Connection's built-in user and group management, as well as Connections installations based on Active Directory and other directory services.

[Contact Partner »](#)

IBM Content Manager Connector

By BA Insight

The IBM Content Manager Connector honors the security of source application and provides both full and incremental crawls so the users have the latest information available to them all the time.

[Contact Partner »](#)

IBM Db2 Connector

By BA Insight

The BA Insight Db2 Connector allows organizations to tap into the wealth of data stored within DB2 databases and applications, and make that data instantly actionable to users through search.

[Contact Partner »](#)

[Get Started for Free](#)[Contact Us](#)

IBM FileNet Connector

By **BA Insight**

Our IBM FileNet Content Manager Connector allows portal users to securely search for content stored in FileNet repositories.

[Contact Partner »](#)

IBM FileNet Content Manager Connector

By **Perficient**

The Handshake connector for IBM FileNet can be used to seamlessly map and index content objects, metadata, filed-in definitions, and permissions to Amazon Kendra, compatible with many styles of Case Manager and Content Foundation deployments (traditional, container, CloudPak and SaaS). Perficient connectors are built on a dynamic framework, boasting configurable preprocessing and transformation pipelines, scalability, and secure deployment and management of your content.

[Contact Partner »](#)

IBM Notes Connector

By **BA Insight**

With the IBM Notes Email Connector, users have the ability to search Notes emails directly from within SharePoint or another portal.

[Contact Partner »](#)

IBM Notes Connector

By **Raytion**

[Get Started for Free](#)[Contact Us](#)

IBM Lotus Notes Database Connector

By BA Insight

With the IBM Notes Database Connector, users have the ability to find content stored in Notes databases using various search engines. Security defined within IBM Notes is automatically reflected in the search experience, which ensures that users see content for which they are authorized.

[Contact Partner »](#)

IBM WebSphere Connector

By BA Insight

BA Insight's WebSphere Connector securely indexes both the full text and metadata of WebSphere objects into the search engine, enabling a single searchable result set across content from multiple repositories.

[Contact Partner »](#)

iManage Cloud Connector

By BA Insight

BA Insight's iManage Cloud Connector securely indexes both the full text and metadata of documents in the Work workspaces into the search engine.

[Contact Partner »](#)

iManage Work Connector

[Get Started for Free](#)[Contact Us](#)[Contact Partner »](#)

Jive Connector

By Raytion

Secure enterprise search connector for reliably indexing content from Jive. It robustly indexes discussions, polls, files, blogs, spaces, groups, projects, tasks, videos, messages, ideas, profiles, and status updates from on-premise and cloud-hosted Jive instances in near real time. The connector fully supports Jive's built-in user and group management and supports Jive's native authentication models, OAuth and Basic authentication.

[Contact Partner »](#)

Jive Connector

By BA Insight

The Jira Connector enables users to perform searches against all Jira objects, eliminating the need to go to Jira directly.

[Contact Partner »](#)

Jira (Cloud) Connector

By BA Insight

The Jira (Cloud Version) Connector performs searches against all Jira objects, eliminating the need to navigate to Jira directly.

[Contact Partner »](#)

[Get Started for Free](#)[Contact Us](#)

The BA Insight Jive Connector was specifically developed for Jive, establishing a secure connection to the Jive application and mapping the content including metadata and attachments from the Jive schema to the search engine schema.

[Contact Partner »](#)

Kaltura Connector

By BA Insight

The Kaltura Connector enables the indexing of not only video, but also a variety of other types of information including Categories, Data, Documents and more.

[Contact Partner »](#)

LDAP Connector

By Raytion

Secure enterprise search connector for reliably indexing content from directory services compatible with the Lightweight Directory Access Protocol (LDAP). It robustly indexes LDAP objects from Active Directory, Novell E-Directory and other LDAP-compatible directory services in near real time. The connector can be used for ingesting principals into Amazon Kendra for use cases like expert, equipment and location searches or for implementing security trimming for custom data sources. The connector supports LDAP over SSL.

[Contact Partner »](#)

LDAP Connector

By BA Insight

[Get Started for Free](#)[Contact Us](#)

LegalKey Connector

By [BA Insight](#)

BA Insight's OpenText LegalKEY Connector securely indexes both the full text and metadata of client and matter records in LegalKEY into the SharePoint and/or Azure search engine, enabling a single searchable result set across content from multiple repositories.

[Contact Partner »](#)

LexisNexis Connector

By [BA Insight](#)

The LexisNexis InterAction connector honors the security of the source system and provides both full and incremental crawls so that users have the latest information available to them all the time.

[Contact Partner »](#)

M-Files Connector

By [BA Insight](#)

The M-Files connector enables indexing of content managed by the M-Files platform and supports both Full and Incremental crawling to ensure index freshness.
